To whom it may concern,

This is an invitation letter to Mr. Estêvão Gomes to visit the University of Wisconsin-Madison (UW), in the United States, from April 15 to April 19. I currently serve as the supervisor of Estêvão at his "Novos Talentos em Física" scholarship, having an appointment as an Invited Professor at IST, University of Lisbon, and an appointment as a professor at UW. At UW, we are performing research in plasma physics and fusion energy, and we have several experiments in the area. This is the same area that Estêvão is researching during his scholarship. His work directly relates to the work of our group and some of my colleagues at the HSX experiment at UW. Therefore, it is my honor to invite Estêvão Gomes to visit UW, tour our facilities, and connect with theorists and experimentalists here.

During this time, we will also host several visitors from overseas, including visitors from Cornell University and the Max-Planck Institute for Plasma Physics, and we will organize a mini-symposium. We would appreciate it if Mr. Estêvão could present his work at the symposium.

Thank you very much for your consideration. Please do not hesitate to contact me for any additional information or clarifications.

Sincerely,
